

PLANTING IMPACT REPORT

JANUARY 20, 2024

40

Total Mangrove trees planted
Species Planted: Grey Mangrove

PLANTING LOCATION:
AL ZORAH RESERVE
25°25'46.4"N 55°28'46.8"E

An estimated total of
12,320 kg
will be sequestered over
the life of the mangroves.

FACTS ABOUT MANGROVES

Carbon Storage potential is 3 to 4 times higher than that of tropical rainforests

Ten square kilometres of mangrove forest can store the same amount of carbon as 5,000 hectares of tropical upland forests

Mangroves provide a habitat for up to 80% of fish population
